Are you an active user who looking for fast and precise way to create financial report for management?

If answer is “YES”, join this class...

Account Schedule in (NAV/ BC) is a tool for creating financial statement that delivers insights into the financial data stored in your chart of accounts. Account schedules analyze figures in G/L accounts, and compare general ledger entries with general ledger budget entries by Dimensions. It can be exported directly into Excel, it is also possible to export them directly into PDF to attach to an email as a report pack.

After complete 1 hour class, you will be able to create various financial statement by maximize the Account Schedule functionalities. It is easy, no need to prepare anything.
